

Ord Community Water Augmentation

Presentation to FORA Board
April 10, 2015

*Jonathan Garcia,
Principal Planner*

Coordination

- To address Board's questions, FORA hosted staff-level coordination meeting with MCWD, CalAm, MRWPCA, and others.
- Clarifications: CalAm project modeled 1200 AFY MCWD desal plant.
- CalAm project is in shallow aquifer, not in the 180 ft. aquifer, which is likely for MCWD

- 16 questions and answers generated at previous Board meeting (see **Attachment B**).
- 10% design necessary to answer technical questions.
- FORA and MCWD are available to answer questions today.

Recommendation FORA

- Authorize Ord Community Water Augmentation 10 percent Conceptual Planning.

Questions
